Agenda

2024 Retail Banking

01 Dataset Overview

02 Deep Dive Insights

03 Key Findings & Recommendations

04 Data Limitations & Next Steps

Retail Banking Analysis

Cambridge SAVING BANK

QUESTIONS

Explore data & Identify the specific problem and the goals.

1

PREPARE DATA

Remove errors, duplicates, and missing values to ensure accuracy.

2

LOGICS & INSIGHTS

Build out logics and insights to find initial patterns or trends.

3

VISUALS

Create clear graphs and reports to share results with others.

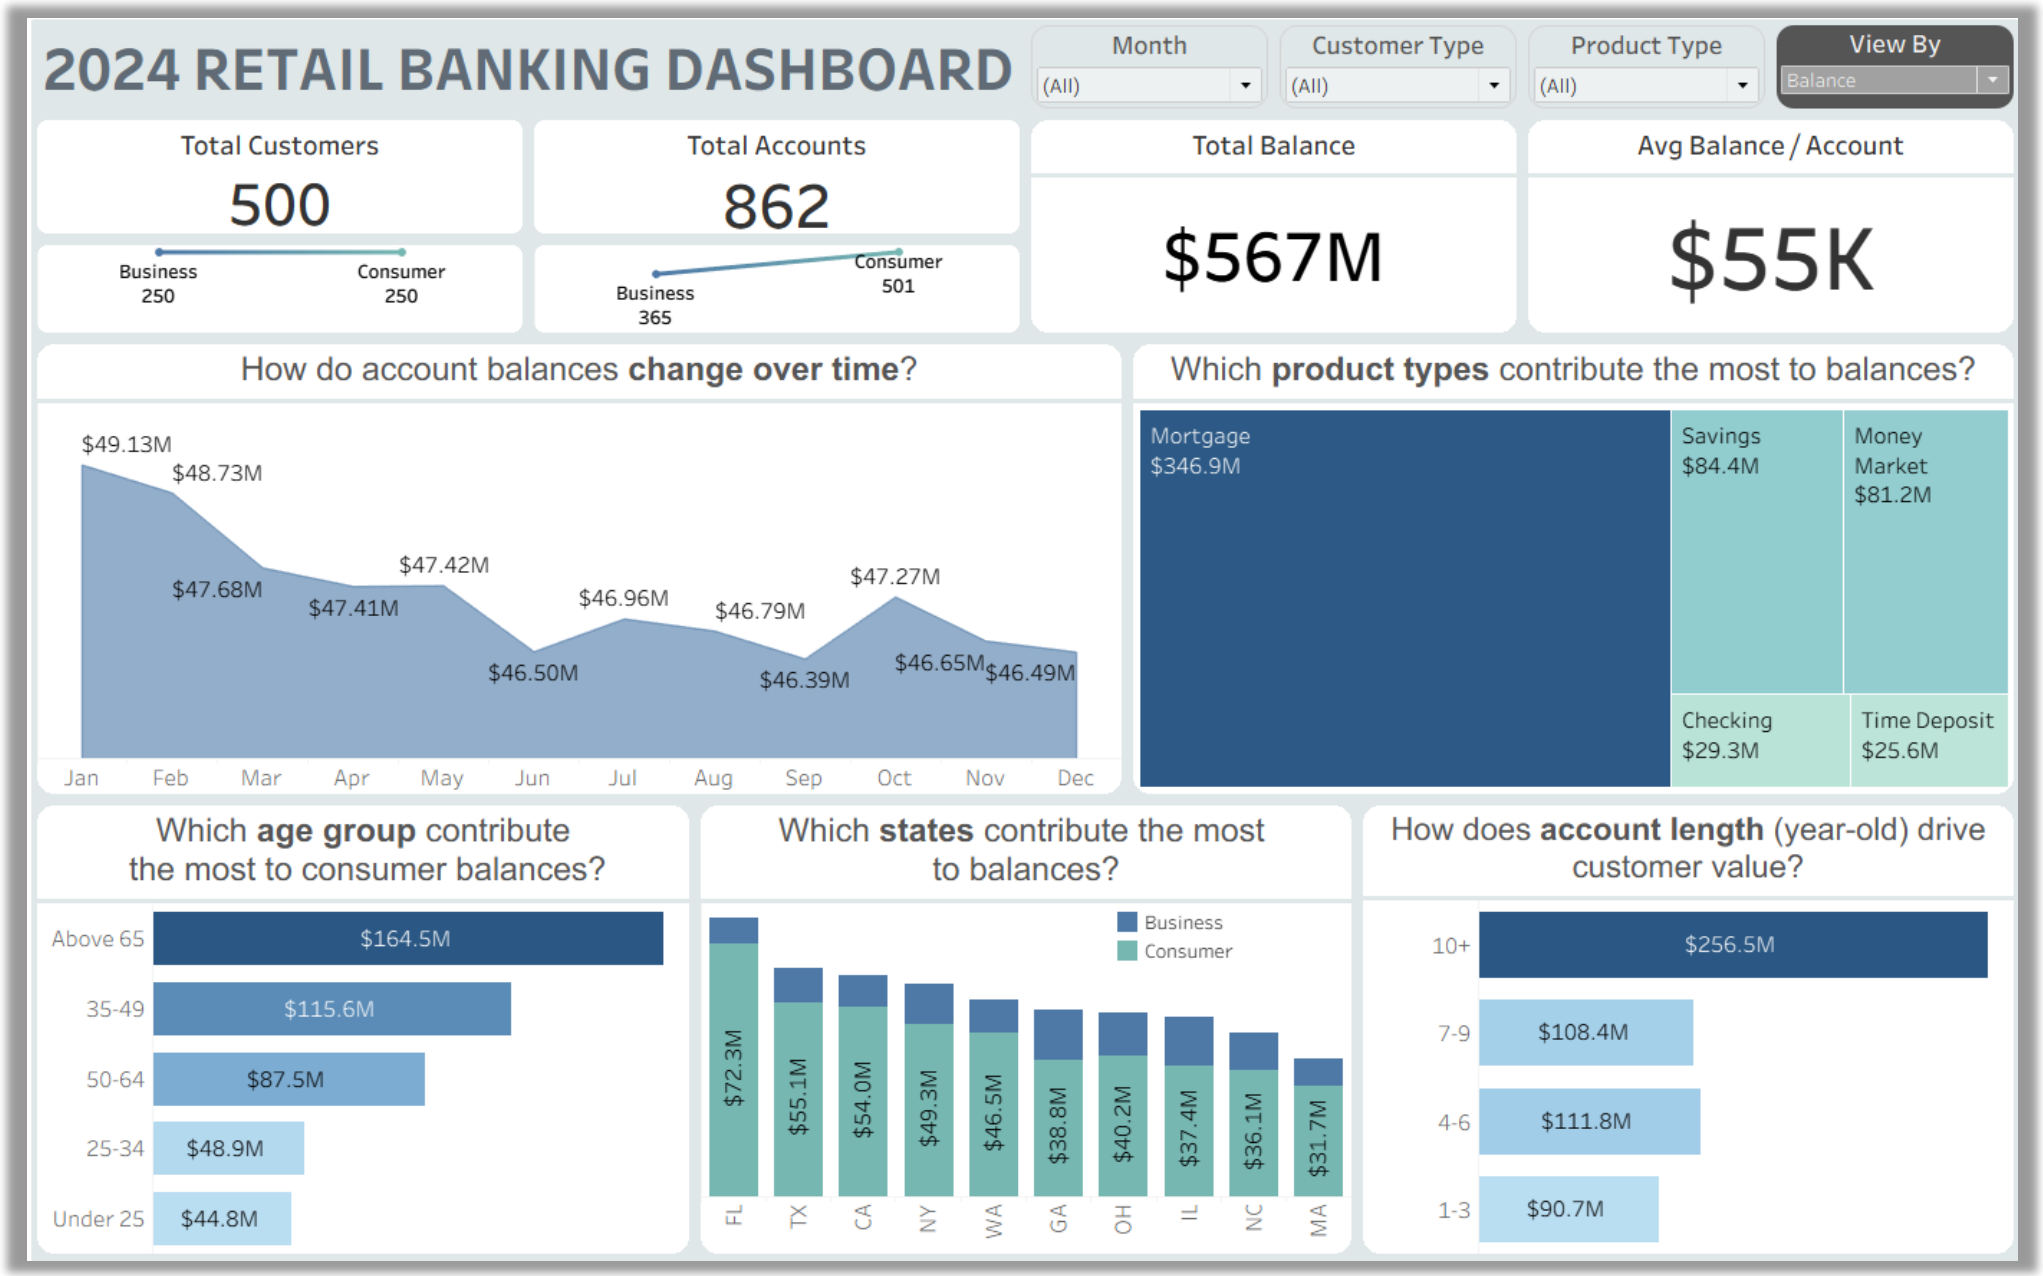
4

SHARING

Deliverables, conducting reviews, transitioning outcomes.

5

DASHBOARD OVERVIEW



Dataset Overview

Data Sources

RetailBanking_Customers

500 unique customers
Customer ID, Date of Birth, State

RetailBanking_Accounts

867 accounts
Product Type, Open Date,
Monthly Balances Jan–Dec 2024

Join Key

Customer ID

Total Records

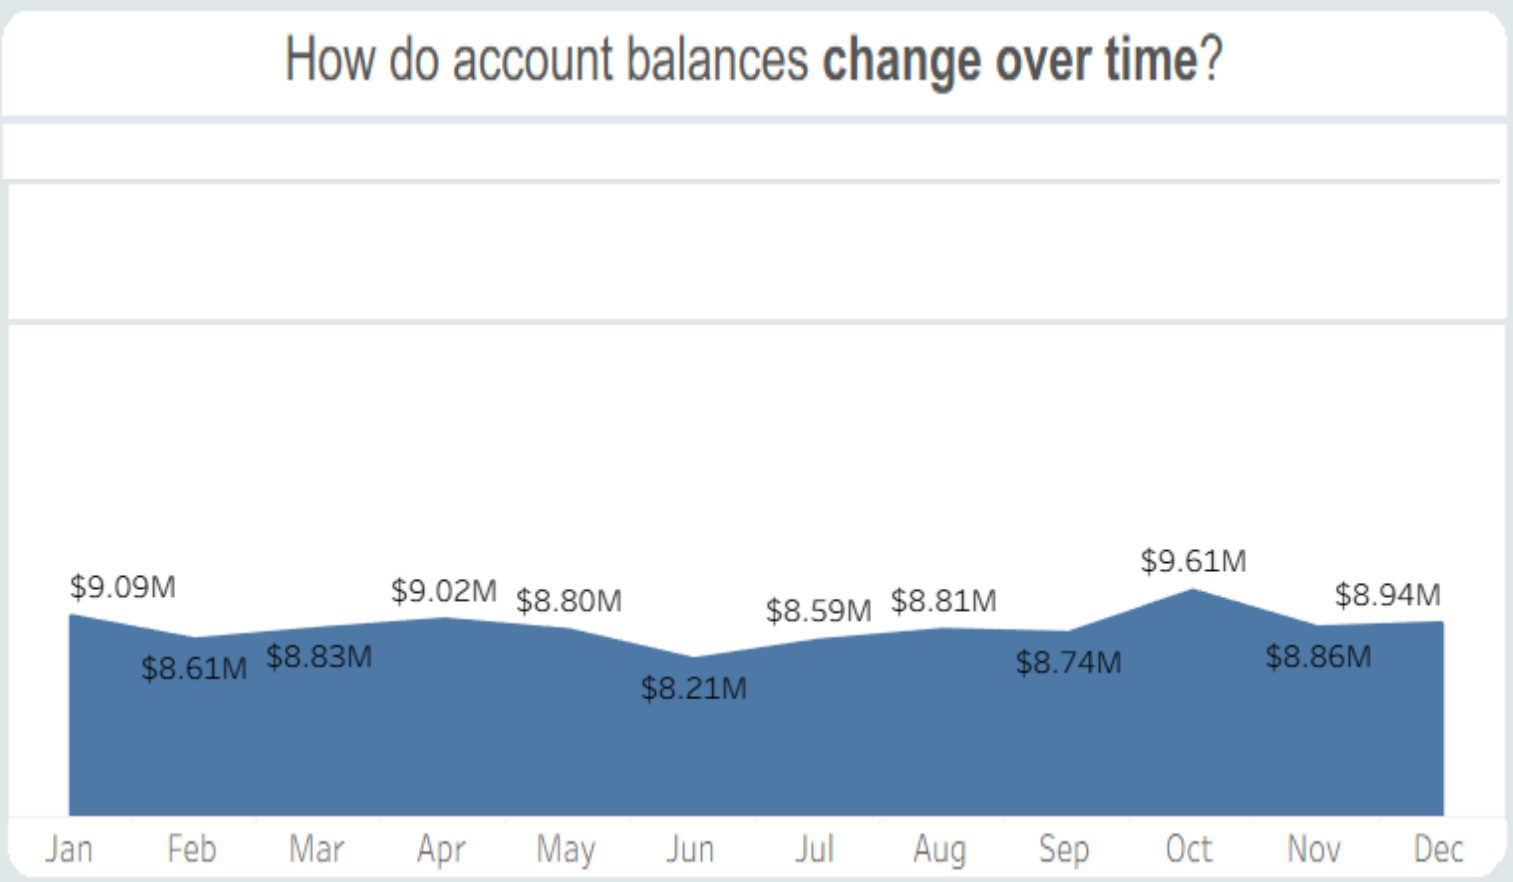
10,392 rows after
unpivoting monthly columns

Data Cleaning & Preparation

1. Removed 366 duplicate customer rows (866 rows → 500 unique customers)
2. Derived Customer Segment from ID prefix (CUST = Consumer · BUS = Small Business)
3. Calculated Age & grouped into 5 cohorts (Under 25, 25-34,35-49, 50-64,65+)
4. Unpivoted 12 monthly balance columns into Month + Balance fields
5. Calculated Account Tenure & grouped into 4 bands (1–3, 4–6, 7–9, 10+ yrs)

Finding 1 — Balance Decline

Total balances declined 5.4% from January to December 2024



-$2.6M

Drop Jan → Jun

5.4%

Full-year decline

$49.1M

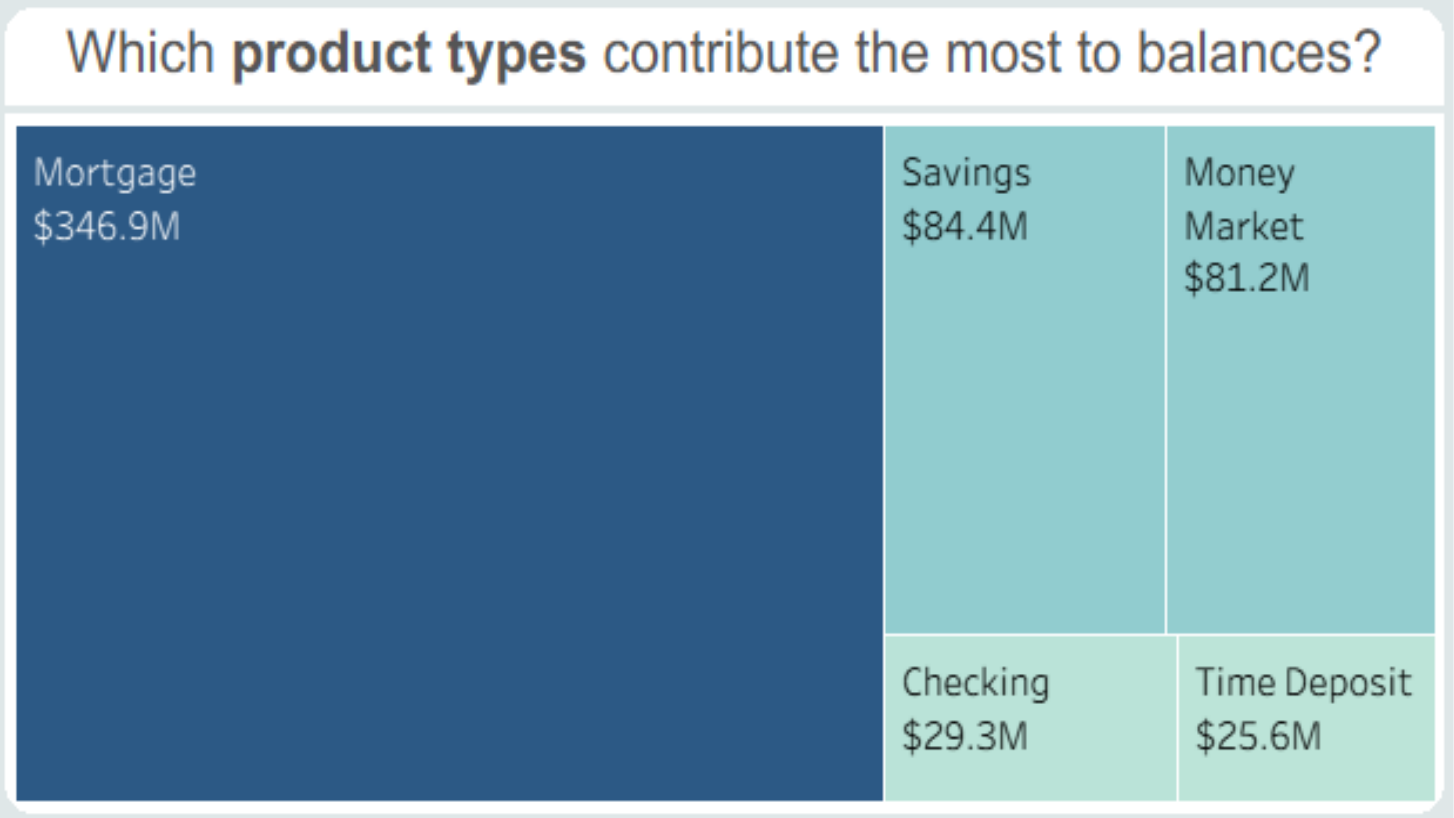
Peak (January)

$46.5M

Trough (December)

Finding 2 — Product Concentration Risk

Mortgage accounts for 61% of total balances — from just 12% of accounts



Mortgage share of balances

61%

346.9M of $567M total

Mortgage account count

107

Only 12% of all accounts

Small biz product access

2 / 5

Savings & Money Market only

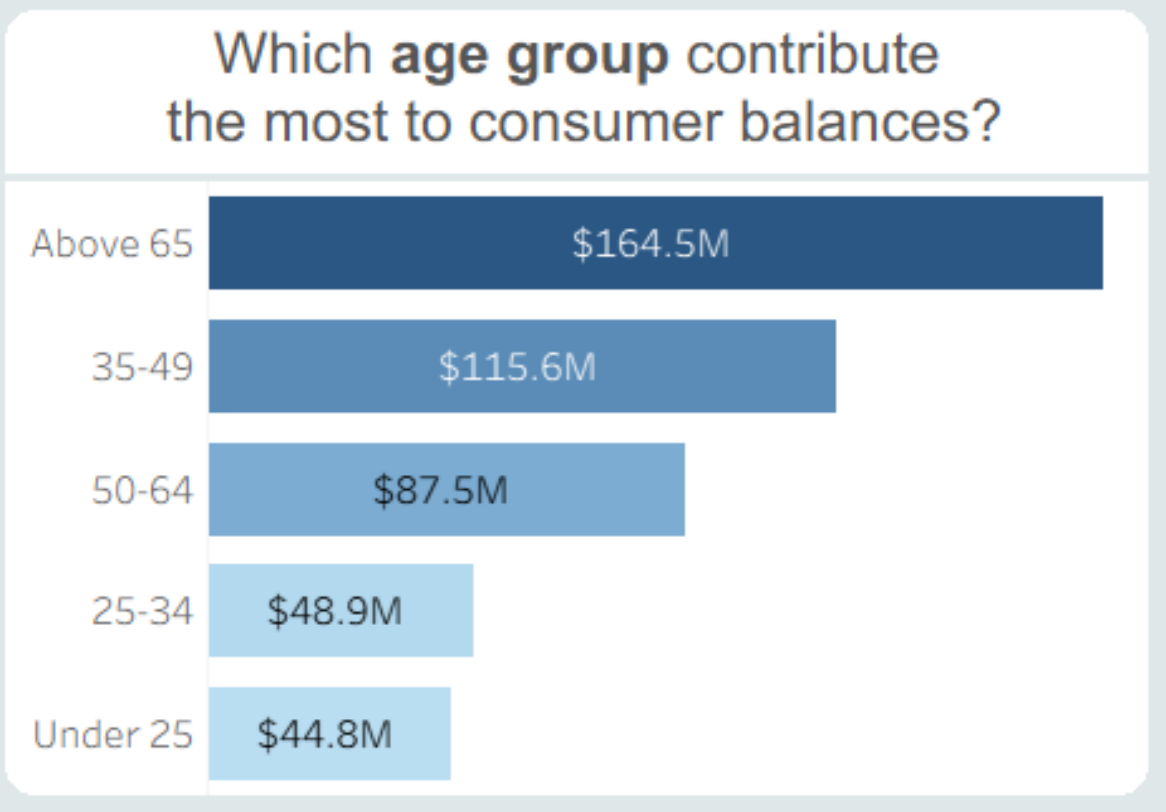
Cross-sell gap (products)

3

Checking, Mortgage, Time Deposit

Finding 3 — Customer Segmentation

Aging consumer base and underleveraged small business segment



65+

$164.5M

Largest cohort — Declining — retirement drawdowns

35–49

$115.6M

Growth sweet spot — Peak earning, cross-sell opportunity

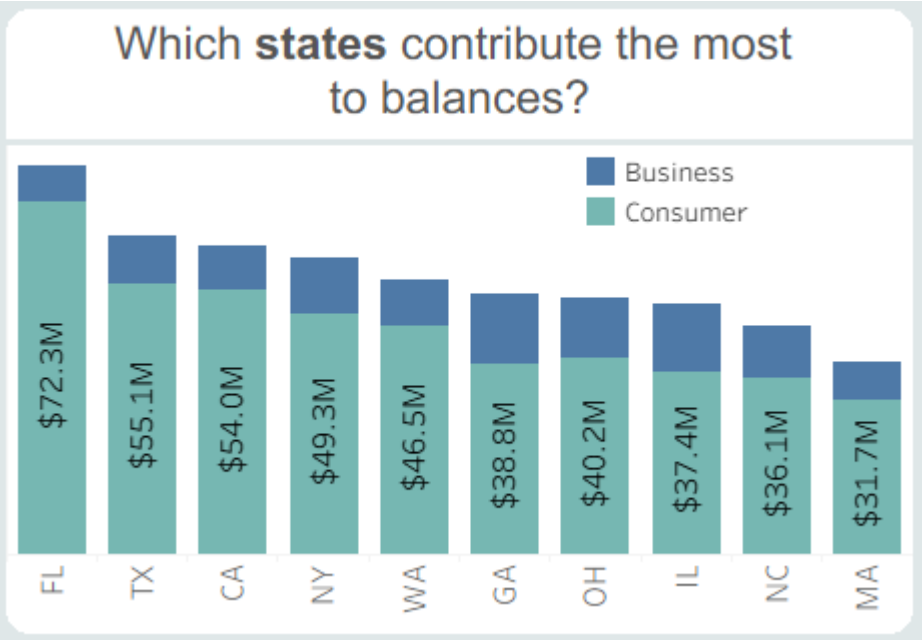
<35

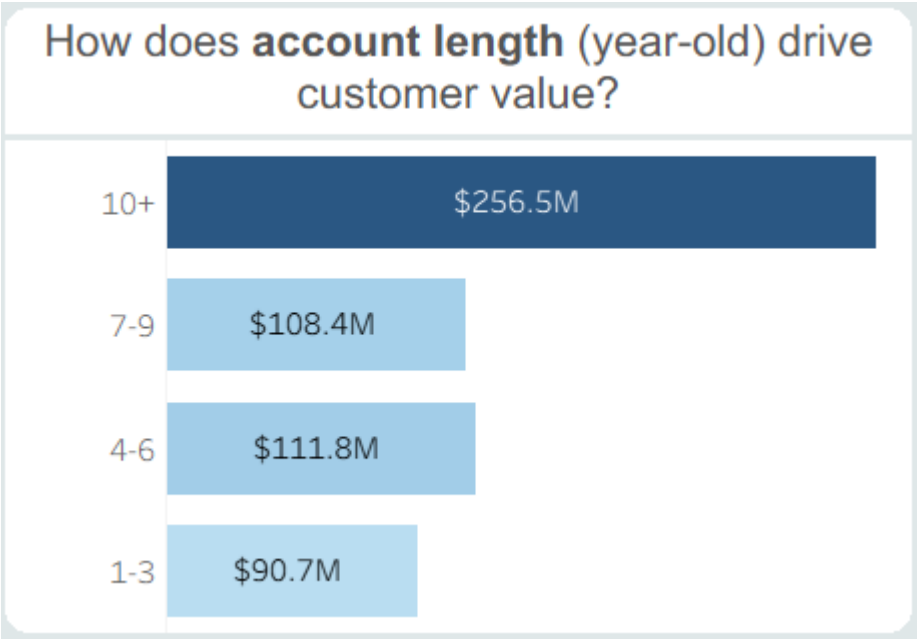
$93.7M

Under-35 total balance — Lowest — future growth pipeline

Finding 4 — Geography & Account Tenure

Florida leads driven by retirees; long-tenured customers hold the most value

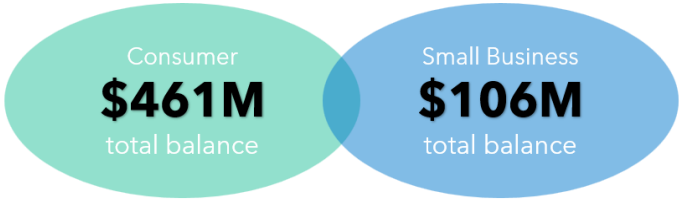




Florida's #1 rank likely mirrors the 65+ retiree concentration geographic and demographic risks are directly linked.

10+ year customers hold 3x more than 1-3-year customers. Retention is the biggest lever for protecting balances.

KEY INSIGHTS



01

Total balance declined 5.4% YTD.
$49.1M in January to $46.5M in December.

02

Mortgage = 61% of Total Balance *($346,9M)*

03

65+ Customers hold $164.6M. The largest balance segment – but a declining one.

04

Small businesses are underleveraged. Small businesses represent 50% of our customer base but only **19%** of total balances and hold only Savings & Money Market.

05

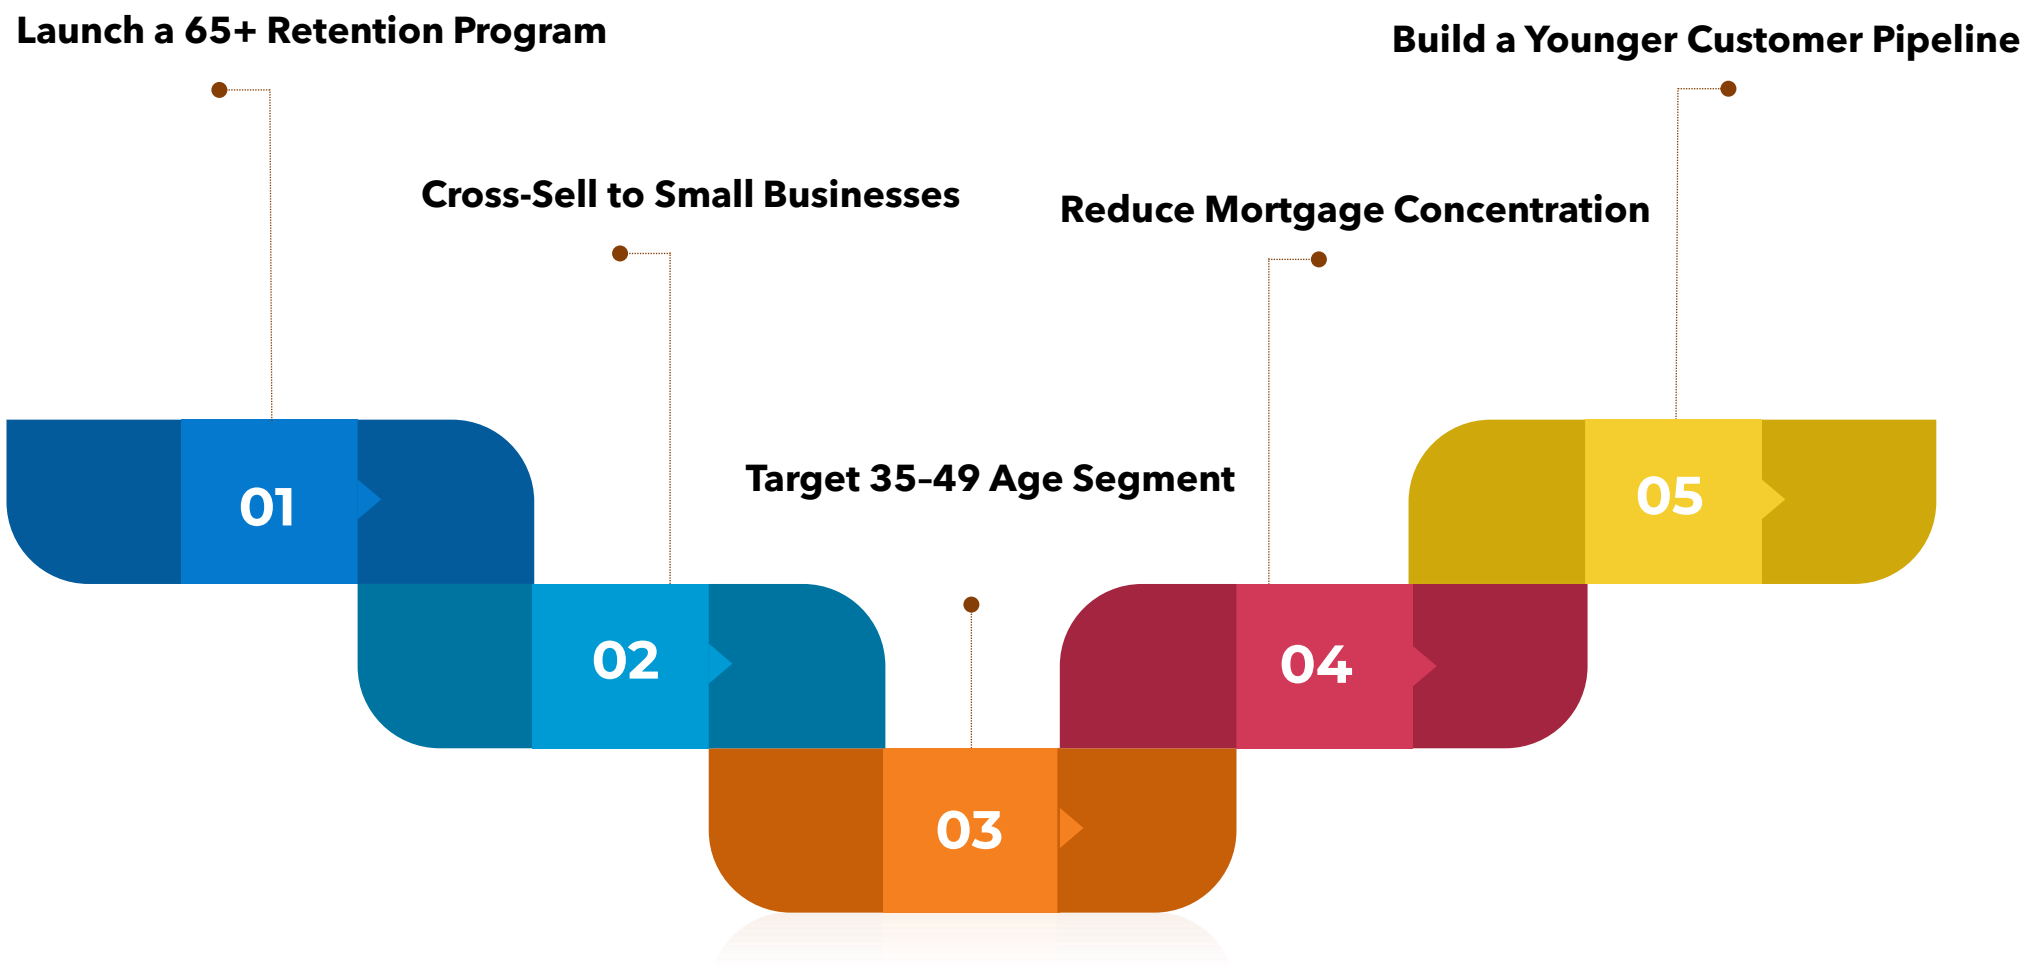
Loyalty drives value Customers with 10+ years hold $256.5M – nearly 3x the 1-3 year cohort.

06

Florida leads the balance segment with $72.3M (consumer) and $7.3M (small business)

RECOMMENDATIONS

Under-35 cohorts represent the bank's lowest balances today but highest lifetime value potential. Invest in digital-first or student banking products.



Data Limitations

Additional Helpful Data

- **Transaction Data**
  Spend behavior & patterns
- **Income & Credit Score**
  Risk-adjusted segmentation
- **Digital Engagement**
  Mobile/online activity
- **Business Revenue / Size**
  Better SMB tiering
- **Loan & Credit Products**
  Full wallet view

THANK YOU!
